ABOUT ME

A fresh graduate in Computer Systems from Gunadarma University with a strong interest in system development, data analysis, and improving the efficiency of technology-based work processes. Experienced in academic projects involving system design, testing, and structured problem-solving. Possesses strong analytical skills, attention to detail, and the ability to work effectively both independently and collaboratively. Committed to continuous learning, adapting to professional environments, and contributing to the development of effective and well-organized technological solutions.

EDUCATION

Bachelor's Degree in Computer Systems | Gunadarma University, Depok

2022 – 2026

IPK 3.79/4.00

Senior High School, Science Major | SMA Negeri 46, Jakarta

2020 – 2022

Senior High School, Science Major | SMA Cendrawasih 1, Jakarta

2019 – 2020

PROJECT EXPERIENCE

- Door Alarm System with Infrared Sensor

Sep 2023 – Dec 2023

Developed an alarm system based on infrared sensors and a buzzer to automatically detect door openings.

- Encoder and Decoder System

Apr 2024 – Jun 2024

Implemented a simple digital system for encoding and decoding binary data using logic ICs.

- Flood Sensor System

Sep 2024 – Dec 2024

Designed a flood detection system using a water sensor for early warning purposes.

- Home Security System

Apr 2025 – Jun 2025

Developed a home security system based on motion sensors and an alarm using a microcontroller.

- Smart Door Security System

Apr 2025 – Jul 2025

Developed an automated door security system with RFID and fingerprint sensor authentication, integrated with a servo motor actuator.

TRAINING AND CERTIFICATIONS

- **Computer Network Requirements Identification**

27 Feb 2023 – 4 Mar 2023

Studied hardware requirements analysis and basic network topology.

- **Computer Network Connection Implementation**

5 Jun 2023 – 24 Jun 2023

Completed training on LAN/WLAN installation, network configuration, and connectivity testing.

- **Introduction to IoT: Exploring IoT Engineer Career Opportunity in Digital Era**

Oct 12 2023

Introduction to Internet of Things concepts and career opportunities as an IoT Engineer.

- **Introduction to Flutter: Mobile Developer Future Career Opportunity**

Oct 16 2023

Introduction to Flutter for cross-platform mobile application development and career pathways.

- **Network Addressing and Routing Management**

19 Feb 2024 – 2 Mar 2024

Learned IP address configuration, subnetting, and basic static routing.

- **Drone**

12 Jul 2024 – 13 Jul 2024

Studied drone technology, working principles, and basic operation.

- **Computer Network Troubleshooting and Recovery**

17 Feb 2025 – 1 Mar 2025

Learned network troubleshooting and recovery techniques using monitoring tools.

- **Computer Network Performance Optimization**

16 Jun 2025 – 21 Jun 2025

Developed foundational knowledge of computer network performance optimization and network analysis.

- **Design Embedded System Programming Microcontroller Based Control System**

22 Sep 2025 – 27 Sep 2025

Gained practical knowledge of embedded systems and microcontroller programming development.

- **JavaScript Programming Language Fundamentals**

15 Jan 2026

Developed foundational skills in JavaScript programming and web development.

- **Intro to Software Engineering**

13 July 2026 – 17 July 2026

Completed a coding program focused on software engineering and web development fundamentals.

SKILLS

- **Programming Languages:** Java, Python, C++, JavaScript
- **Frameworks & Tools:** Flutter, Git, Firebase, Arduino IDE, ThingSpeak
- **Networking:** TCP/IP, Routing, LAN/WLAN
- **Productivity:** Microsoft Office, Google Workspace
- **Content Creation:** Canva, Blender 3D, Adobe Photoshop
